

阿里巴巴保密信息 / ALIBABA CONFIDENTIAL

## Improvements:

My design idea is that my website will update three recipes for breakfast, lunch and dinner everyday and users don't have to choose among so many choices. The website arrange all for you.

Besides, users can check the calorie info on the recipe. And they can check the whole week's recipe in 菜篮子 page.

## **Users Test:**

1.

A 23-year-old girl who lives by herself in Shenzhen. She is preparing for the Test for National Civil Servants. She is used to ordering food delivery and sometimes choose to cook herself.

Comment: If you can add some equation of how much work need to do to consume the calorie, it'd be great. For example, 300 calories=10mins Bobby jump

A 23-year-old girl who lives with one roommate in Guangzhou. She works in an advertising company and sometimes need to cook on weekends.

Comment: I need the bookmark function because I want to be able to bookmark the dishes I like.

3.

A 23-year-old girl who lives with one roommate in Guangzhou. She works in an video advertising company and need to prepare lunch for herself to eat the next day because her company don't have canteen.

Comment: If there is a community, I'd be very satisfying. So users can upload their own UGC content, like posting their own work following the recipe. The other users can click likes and comment below.

4.

A 22-year-old girl who stays at home. Her family need to work on weekdays so she needs to cook for herself everyday except weekends. She is now studying online.

Comment: Can you add some videos besides the pictures and text? 5.

A 22-year-old boy who works in Internet company and have a very busy life. Though he lives with other roommates but they don't usually have meal together. He is not good at cooking but he sometimes will cook for himself on weekends. But he like something easy to prepare."

Comment: You can add the time needed to cook the dishes besides the recipe. I would like to know how much time I need to spend on this.
